EXPERIENCE

Designer / Front-end Web Developer

MAR 2011 - PRESENT

Goldstar, Pasadena, California

- Responsible for designing user interfaces and producing modern & accessible HTML/CSS for Goldstar.com
-

Interaction Designer

OCT 2009 - MAR 2011

GOGII, Marina del Rey, California

- Responsible for overall UI design — conceptualizing & crafting new features for textPlus, a free iOS and Android texting app.
 - Produced user flows and user interfaces for iOS & Android.
 - Produced marketing materials for textPlus, including maintaining the website, textPlus.com, and in-app ads.
-

Principal

SEPT 2003 - PRESENT

Deadbolt, Los Angeles, California

- Responsible for overall management of the company, including client interaction, research, strategy, and executing the project plan.
 - Producing brand identities & visual designs from for small to medium size companies.
 - Authoring HTML & CSS and migrating code into a content management system to manage dynamic content.
-

Interface Designer

DEC 2006 - APR 2009

Planet Argon, Portland, Oregon

- Responsible for designing and developing user interfaces for client web applications written in Ruby on Rails.
 - Provided art direction and collaborated on user experience direction.
 - Produced visual designs for web applications from the layout to the user interface elements.
 - Authored HTML, CSS, and (a small amount of) javascript in Ruby on Rails applications.
-
